

Ideation Phase

Empathize & Discover

Date	01 October 2026
Team ID	SWTID-2026-4457
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	4 Marks

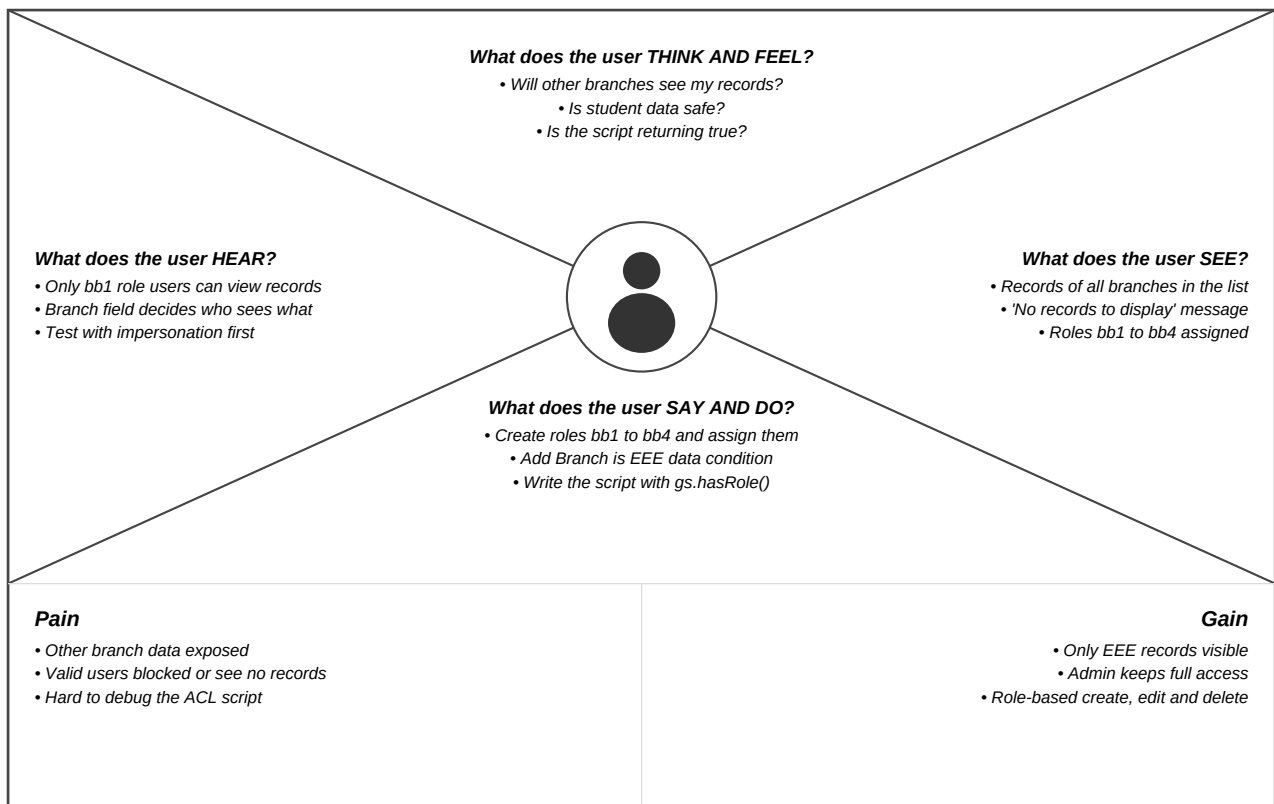

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes while working with record access in ServiceNow.

It is a useful tool that helps the team better understand the users of the Script-Controlled ACL, such as administrators and EEE branch users. Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with their goals and challenges in restricting record access based on field values.

Example:

Empathy Map – Script-Controlled ACL

Project: Script-Controlled ACL – Restrict Record Access Based on Field Value
